In addition, it offers an effective treatment for rosacea and other skin conditions that feature redness or enlarged pores.

IPL (Intense Pulsed Light or "Photofacial")

Laser Hair Removal

Motus AY Laser

WHY WAX? A **PAIN FREE**, safe, and effective treatment for light to dark skin types. The Motus AY can be used to target and remove unwanted hair. The laser emits a light that is absorbed by the pigment (melanin) in the hair. The light energy is converted to heat, which damages the hair follicles that produce hairs. This damage inhibits or delays future hair growth, which means less time shaving and worrying about unwanted body hair. Multiple treatments will be needed.
